## **Key Information**

This course is designed for non-native teachers of subjects (biology, geography, physics, history, etc.). It aims to introduce and explain the CLIL approach to teaching academic subjects in L2, while also helping participants to refresh their own English language skills. The course will comprehensively examine all aspects of CLIL, while giving participants the opportunity to practice the methodology. Participants will understand that the needs of learners in L2 lessons are vastly different to those in L1 lessons, and will develop and practice teaching techniques that can support and motivate subject students in new ways.

### Objectives

The Erasmus Plus course on CLIL Methodology for Higher Education focuses on the development of lesson facilitation where the dual targets of content and language are being simultaneously pursued. Sessions in this course will focus on scaffolding lessons, increasing communicative interaction among student, setting collaborative tasks, introducing target language, promoting enquiry-based learning, providing support for the learners.

### Programme

This seminar will take place in the beautiful city of Galway, on the Atlantic Ocean coast, known as the cultural capital of Ireland. Participants will be provided with Erasmus Plus Staff Mobility (STT) certificates and EUROPASS upon completion. With a duration of 5 days (25 hours of classes, divided between morning and afternoon), the seminar also includes a cultural immersion in various activities including an Irish Dance Night and Irish Pub Night. There is also the option of a day-trip to the splendid Aran Islands on Saturday.

## Participants

This course is designed for teachers at third level colleges and universities who work with students in seminars, tutorials and workshops, using English as the medium of communication. Participants should have CEFR level B2 or higher in English, and be prepared to develop their use of English for the facilitation of CLIL lessons with non-native speaking students of their academic subjects.
